Water Treatment & Restoration

## A web-based scientific counting software

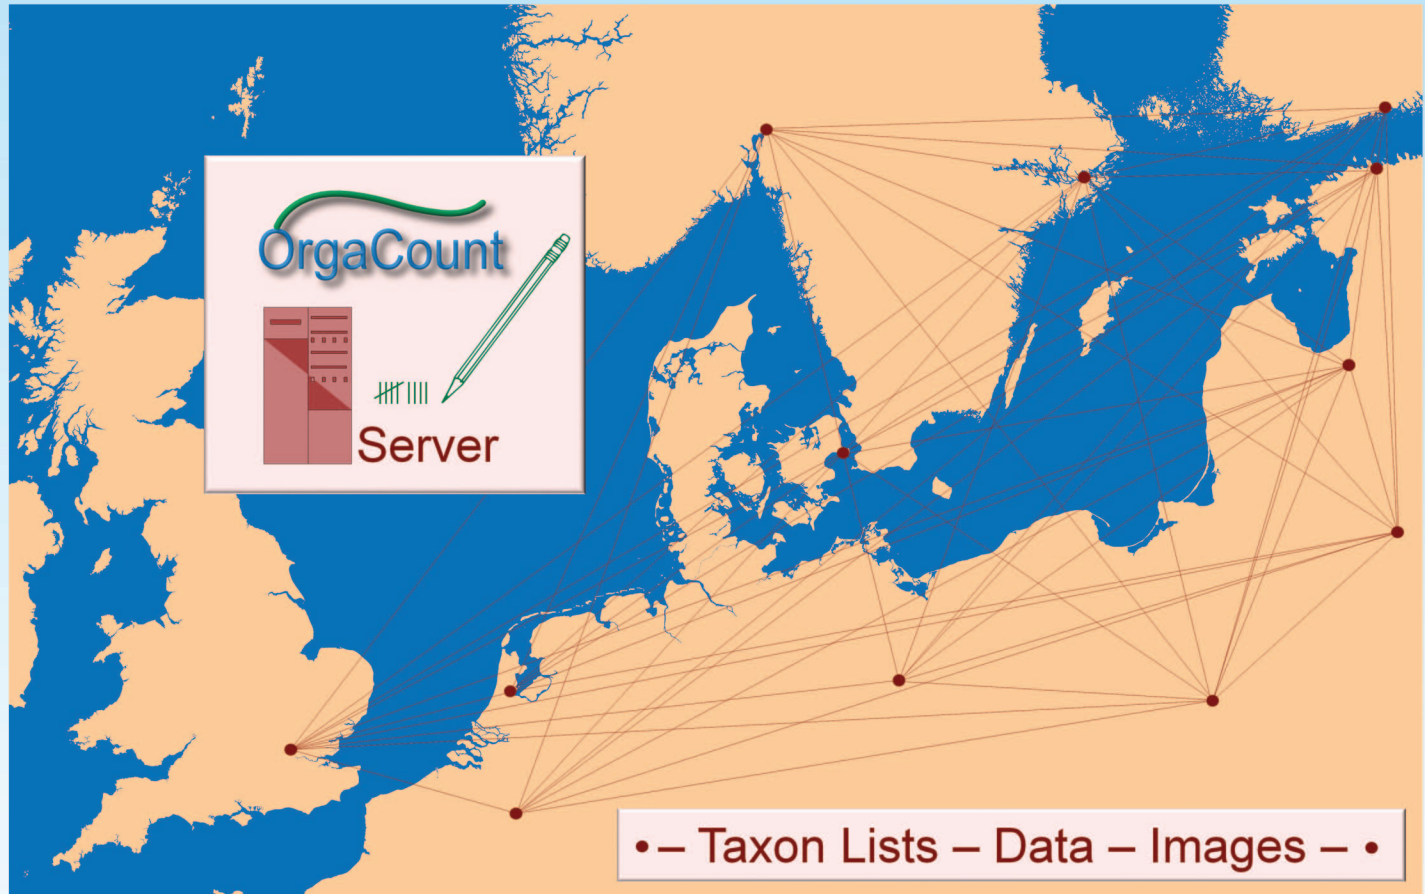

## 5 good reasons for the Server version

- Web-based application for almost any countable item, usage via simple browser from your PC
- Server version with secure access for the user from all over the world or just from the neighbouring lab
- Standardisation of taxon/species lists according to approved monitoring and assessment systems
- Multiple-user access
- Wide range of reporting and statistic features, continuously expanding

Get your items counted, exchange images, disseminate reports, stay in touch with your international colleagues.

Just enjoy your work with OrgaCount Server!
